

Retail Product Revenue Analysis

This project analyzes the revenue generated by five retail products: T-shirt, Jeans, Jacket, Shoes, and Cap.

Key Metrics:

- Units Sold
- Price per Unit (QAR)
- Total Revenue (calculated)

Findings:

- The product with the highest revenue is Shoes.
- The total revenue generated by all products is QAR 49300.

A bar chart is included below to visualize revenue by product.
